

MIAMI DADE COUNTY
SURVEY SECTION

**BENCHMARK
BOOK**

(NGVD 1929)

July 2007

DISCLAIMER

The information in this package has been assembled for the use of Miami-Dade County Public Works Department for the design and development of Public Works Projects. No degree or order of accuracy has been assigned to data in this package. Although this package has been prepared from the best available information, Miami-Dade County assumes no responsibility for the accuracy or completeness of the information or any errors or omission and makes no warranties, express or implied, concerning accuracy, completeness, reliability or suitability of this data. This data should not be relied upon as the sole basis for solving a problem whose incorrect solution could result in injury to person or property.

Elevations must be verified consistent with procedures established by Chapter 472 Florida Statutes "Land Surveying and Mapping" and the Florida Administrative Code Chapter 61G17-6 "Minimum Technical Standards".

BENCHMARK NAME LOOKUP WITH PDF FIND:

FOR INDEX PURPOSES, NAMES WERE MOSTLY ENTERED AS FOLLOWS:

N-705

N- 36

N- 5

EXAMPLE: TO LOOK UP N- 36, YOU WOULD ENTER N THEN 1 SPACE THEN NUMBER.

HOW TO USE LOCATOR NUMBERS

Each benchmark has a locator code of four digits and an optional alphabetic suffix.

The **First** digit is the last number of the township (ex. 54- = 4)

The **Second** digit is the last number of the range (ex. 54-39 = 49)

The **Third** digit is the number of miles West of the Northeast corner of the township (5 mile maximum.)

The **Fourth** digit is the number of miles South of the North line of the township (5 mile maximum.

When the four digits are followed by an alphabetic suffix (ex. N,S,E,W,NE,NW,SW,SE) the location of the benchmark is within one-half mile of the section corner by locator and in the suffix direction.

Note: Benchmarks on Key Biscayne are at the front of the benchmark listing and are given a locator of “0001” etc. in order starting at the mainland.

An **Index by Street and by Avenue** has been included to further help you locate the nearest benchmark.

BENCHMARK CONVERSION TABLE

NGVD 1929 to City of Miami (MLW)	+0.26'
City of Miami (MLW to NGVD 1929)	- 0.26'
